

AZURE AI SOLUTIONS ARCHITECT

ABOUT DYSRUPIT

DysrupIT is a leading Australia based cloud services company. We support clients across the globe in their adoption of the cloud and their transformation to as-a-Service business models. DysrupIT is dedicated to making a positive impact in the communities it serves.

COMPANY CULTURE

We are constantly looking for talented people to join our team. We offer a unique and extraordinary career experience to motivate and inspire talents like you to make a difference in our customers, clients, and the entire organization. At DysrupIT, you'll join a team of dedicated and brilliant professionals who shares the same goal of pursuing integrity and excellence. We are committed to promoting a culture where employees are valued and respected. We invest in our employees and make sure that they will have the right training to secure their growth and advancement towards their career aspirations.

JOB SUMMARY:

We are looking to onboard a Senior Azure AI Solutions Architect to lead the growth of our AI practice. This is a strategic, high-impact role focused on delivering end-to-end AI solutions using the Microsoft Azure ecosystem. The ideal candidate will bring deep technical expertise, client-facing experience, and a strong blend of pre-sales acumen and hands-on delivery. Prior exposure to global deployments (US/EMEA) and a track record of building scalable AI solutions are highly desirable.

JOB RESPONSIBILITIES:

- Serve as the technical lead and trusted advisor for AI engagements built on Microsoft Azure.
- Work closely with sales teams to support pre-sales efforts, including client workshops, proposal development, and solution demos.
- Design and architect AI/ML-based solutions using Azure AI services (e.g., Azure OpenAI, Cognitive Services, Azure Machine Learning).
- Build and deliver Proof-of-Concepts (POCs), MVPs, and production-grade AI applications.
- Drive the full project lifecycle—from requirements gathering and design to development, deployment, and optimization.
- Define best practices, patterns, and governance models for Azure AI solutions across the organization.
- Mentor development teams and collaborate with global stakeholders including business, engineering, and delivery leadership.

- Stay updated on emerging AI trends, tools, and Microsoft's AI product roadmap.

JOB QUALIFICATIONS:

- 10+ years of IT experience with at least 5 years in Azure-focused solution architecture.
- Proven experience delivering AI/ML solutions on Azure, including Azure AI, Azure Machine Learning, Azure Cognitive Services, and Azure OpenAI.
- Strong hands-on experience with Python, C#, and Azure SDKs for building and deploying AI models.
- Solid understanding of data engineering, cloud architecture, and DevOps/MLOps for AI.
- Strong pre-sales and client engagement experience, including proposal writing and stakeholder presentations.
- Experience working in or with global teams and exposure to US or EMEA markets.
- Exceptional communication skills with the ability to interface across technical and executive levels.

SOFT SKILLS:

- Excellent verbal and written communication skills
- Excellent interpersonal and conflict resolution skills.
- Strong analytical and problem-solving skills.
- Adaptable and flexible
- Organized and keen to details.
- Can work well within a team.
- Has the initiative and self-drive
- Able to work independently and under minimal supervision.
